

# What Will the Ocean Look Like in 2050?

"The ocean is expected to contain 1 ton of plastic for every 3 tons of fish by 2025, and by 2050, more plastic than fish by weight."

-World Economic Forum

"At least 8 million tons of plastics – equivalent to one garbage truck every minute – leak into the ocean each year."

- The Ellen MacArthur Foundation

YOU can help make a change! Be sure to check if items you throw in the trash are recyclable.

**Ocean Conservancy**

Increasing collection rates of plastic to 78% could decrease global plastic leakage by 23%  
The Ocean Conservancy has outlined plans to end plastic dumping in the ocean by 2035.
